EXCEL ORTHODONTICS INC.™

3D PRINTED SPLINTS & OCCLUSAL GUARDS

With Digital Workflows of 3D printing and Keystone clear resin material, it is now possible to manufacture affordable, high-quality occlusal splints.

- Consistent fit and flexural strength

- Minimal adjustments

- Biocompatible, FDA-compliant material

- More accurate than stone models *(stone models received will be scanned and printed prior to fabrication)*

- Minimal thickness is 1.4mm, with additional buildup on occlusal surfaces and slight anterior canine guidance.

- *Turn-around time is 5 days*

- *Cost is $135.20 (not including digital print)*

- *Use code SP112 when ordering*

Please call the office and ask for one of our digital experts if you have any questions.
